I am an earnest techie with keen interest in every new updates that come up everyday. I love being hardworking and dedicated to whatever I take up as a task. Web development and Android development attracts me the most. But this is just the beginning. I am always brushing up my skills more to attain perfection. Looking forward to gather more knowledge and being more accurate in my field.

## PERSONAL PROJECTS

### Ecommerce Website (BEFRESH GROCERIES)

(10/2020 - 11/2020)

- It's an e-commerce website which is live now on domain befreshgroceries.com. It's built using JavaScript frameworks and also PHP framework called Laravel.

### Ecommerce Website (Django) (02/2021 - Present)

- It's an e-commerce website having all the features of an e-commerce website. It's made using Python framework called DJANGO as its very powerful at server-side rendering. It also has the PAY-PAL payment gateway integration.

### Geek-Music-Bot (12/2020 - 01/2021)

- It's a music bot for Discord servers. It's built on JavaScript library called Discord.js. It fetches songs from YouTube by its API and converts it to MP3 and plays it in the voice channels.

### Billing App (Android App) (12/2020 - 12/2021)

- It's an Android application which helps in generating bill receipts with an organized receipt number. It's built on JAVA and FIREBASE.

## CERTIFICATES

### AWS : Fundamentals of AWS (Going Cloud Native, offered by AWS) (05/2020 - 06/2020)

It was a four-week course and helped me gain knowledge about the AWS services and how to work on the AWS cloud platform.

### SEO (Search Engine Optimization, University of California) (05/2020 - 06/2020)

This course taught me how to perform advanced Search Engine Optimization and here I learned many things regarding the topic and I also implemented it.

### Graphic Design (University of California) (07/2020 - 07/2020)

It's a beautifully designed and structured course. I learned many concepts of UI/UX design and this attracted me more towards front-end development.
